- 0.5 lb - Covers 2,000 Sq Ft
- 0.25 lb - Covers 1,000 Sq Ft

Shop at naturesseed.com

This Bush Monkeyflower seed was collected with permits from wildland areas in Southern California. Bush Monkeyflower ( Diplacus aurantiacus ), also called Sticky Monkeyflower, is a vibrant evergreen subshrub native to California's coastal and foothill regions. It grows 2-4 feet tall and wide, with glossy sticky leaves and a profusion of tubular orange flowers from spring through summer.

**Sun:** Full Sun to Partial Shade | **Height:** 2-4 ft | **Water:** Low

*Encelia californica*

**$21.16 - $71.99**

**4-7 Day Delivery**

**AVAILABLE SIZES**

- 1 lb - Covers 2,000 Sq Ft
- 0.5 lb - Covers 1,000 Sq Ft
- 0.25 lb - Covers 500 Sq Ft

Shop at naturesseed.com

This Bush Sunflower seed was collected with permits from wildland areas in Santa Barbara County, CA. California Bush Sunflower (Encelia californica) is a fast-growing shrub with bright yellow daisy-like flowers. Native to Southern California's coastal sage scrub, it forms a mounding shrub 3-5 ft tall and wide. From late winter through spring it explodes in blooms, providing nectar for bees and butterflies.

**Sun:** Full Sun | **Height:** 3-5 ft | **Water:** Low

*Eschscholzia californica*

**$7.99 - $223.29**

The California poppy is a low-growing wildflower known for its vibrant, cup-shaped blooms and delicate, fern-like foliage. Flowers are typically 2-3 inches wide with silky, four-petaled cups in golden orange or yellow--though some varieties come in cream, pink, or red. Blooms open in full sun and close at night or on cloudy days. Plants grow 6-12 inches tall and wide, forming soft mounds of blue-green leaves.

**Sun:** Full Sun | **Height:** 6-12 inches tall | **Water:** drought-tolerant

*Phlox drummondii*

**$10.99 - $35.69**

**4-7 Day Delivery**

**AVAILABLE SIZES**

- 1 lb
- 0.5 lb
- 0.25 lb

Shop at naturesseed.com

Drummond Phlox (Phlox drummondii) is the only annual phlox species native to Texas. Named after Scottish botanist Thomas Drummond who collected it in Texas in 1833, it produces clusters of fragrant flowers in red, pink, purple, white, and bicolor forms from March through May.

**Sun:** Full Sun to Partial Shade | **Height:** 6-12 inches | **Water:** Low once established

*Eriophyllum confertiflorum*

**$54.11 - $183.99**
